

GENERAL EQUIPMENT

Sieve Shaker

Sieve Shakers gives a circular motion to the material being sieved so that it makes a slow progression over the surface of the sieve.

ProLab Shakers are equipped with a dynamic power source which ensures the right vibration is imparted to the sieves and sample for fast and reproducible tests. The vertical movement is fixed to ensure the sample spends maximum time on the sieve surface.

Our Sieve Shakers are fitted with an efficient clamping device that ensures sieves are held firmly without over-tightening and allows them to be quickly removed and replaced. The timer can be preset for any duration up to 60 minutes.
