CONCRETE

Concrete Mixer Pan Type

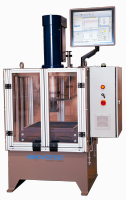

The efficient mixing of concrete is essential if quality specimens are to be manufactured. Pan Type Concrete Mixers are designed to give efficient mixing of both dry and wet materials.

The mixing pan is removable and tilts for easy access to the pan and emptying on completion of the mixing operation. The total volume of the pan is 100 liters, but the effective capacity of the mixers are 56/40 liters. The turning speed of the pan can be adjusted by a frequency controller. (This feature is optional)

The mixer head lifts clear to provide maximum access to the pan and holds the mixing blades at a constant depth during the mixing operation. The pan type mixers are also equipped with rubber wheels which provide high portability.

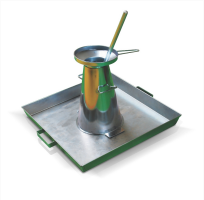

All parts of the mixers are galvanized or painted with non-corrosive paint. The protection class of the mixers is IP55.
